REDEFINING TRUCK PARKING

ROME0: The Next-Gen Truck
Parking Assistance by d-flexx

UV resistant

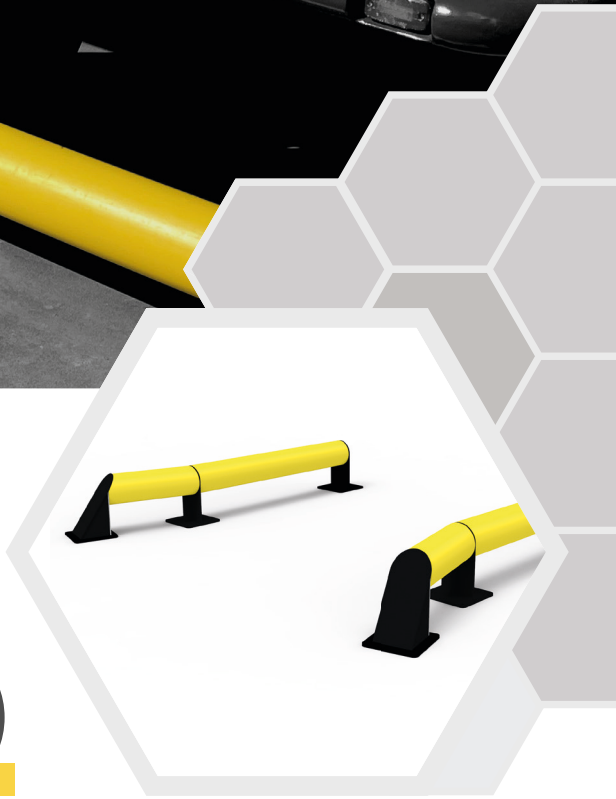

Outdoor use

Corrosion free

Scratch free

Introducing ROME0, the revolutionary truck wheel guide designed to redefine vehicle guidance for freight and logistics professionals. Built with cutting-edge polyethylene, ROME0 delivers unparalleled flexibility, durability, and resistance – the perfect alternative to traditional steel truck guides.

d-flexx - Quality You Can Count On

- The flexible polymer structure protects both your concrete flooring and vehicles from damage caused by friction.
- ROME0 offers exceptional durability while being environmentally friendly with excellent recycling properties.
- In the event of a collision, the rotating tubes reduce damage to vehicles and the truck guide
- Available in two sizes to meet the specific needs of your operation.
- ROME0 is shipped disassembled to multiple blocks, reducing shipping costs and ensuring quick and hassle-free mounting and easy installation.

Step into the future of truck guidance with ROME0 – the innovative solution you’ve been waiting for.
