ABSORBENTS AND SPILL CONTROL

About BRADY

Once you have worked with BRADY, our name will stick with you, (just like our labels) because BRADY is one of the world's leading safety, identification and spill control specialists.

Innovative

At BRADY we continue to improve. We have many customers from all industries, and we strive to be ahead of their needs by continuing to invest in research for even more performant solutions. By developing more user-friendly and efficient concepts, we give our thousands of customers the best in the market.

Strength

At BRADY, we believe our biggest strength is the wide range of identification and safety solutions we can offer our customers, whether it's managing a spill, labelling the smallest component or complete signage for an entire warehouse. We're also proud to offer many products and services - from sorbents and kits to printers, scanners and software to service contracts and on-site training - that compliment any safety identification job. And don't forget, our wide network of expert distributors can always offer you a tailor-made solution to meet your specific requirements.

Trust

For over a hundred years, BRADY has been connected with quality, trust and stability. We demand the best for your products and services, because we know, better than anyone, the importance of good and reliable workplace safety and identification. A prompt and effective response might seem like a given, but every professional knows that this level of readiness is crucial to any business.

Inform

We also have specialised dealers in your region, who can answer all your identification, safety and labelling questions, specific to your activity. They will be happy to provide you with all kinds of options and solutions with no obligation.

CHOOSING YOUR ABSORBENTS

Having the right absorbent for the job makes a big difference. Proper product selection can make your employee's jobs easier, create a safer work environment, and even save you money! These three easy steps will help you find the correct SPC absorbent product for your application.

1 Step one: Know what you're absorbing

Your spill:

- Hydraulic oil
- Motor oil
- Brake fluid
- Cooking oil
- Turpentine
- And other oil-based fluids

Your absorbent solution:

Oil only absorbents

These absorbents are specialised for oil and other petroleum-based spills including paints and other non-water soluble chemicals. These absorbents will not absorb water and will float indefinitely.

Page 11

Your spill:

- Coolants
- Solvents
- Gasoline
- Vegetable oil
- Kerosene
- And other water-based fluids

Your absorbent solution:

Universal absorbents

All-purpose products that clean-up oils, coolants, solvents and water-based fluids anywhere in your facility. Use around machinery, under leaky pipes, in messy traffic areas or for general maintenance projects.

Page 23

Your spill:

- Aggressive chemicals
- Citric acid
- Sodium hydroxide
- And other unknown chemicals

Your absorbent solution:

Chemical absorbents

Surfactant-treated polypropylene absorbents can be used on a wide range of chemicals, including hydrofluoric acid, and are chemically inert, so they will not react with aggressive fluids.

Page 31

Your spill:

- Cutting fluids
- Gasoline
- Coolants
- Non-aggressive chemicals
- And other water-based fluids

Your absorbent solution:

Re-Form™ eco-friendly absorbents

These all-purpose absorbents are made from a minimum of 80% recycled material. The Re-Form™ products are green to produce and green to use, and are up to 50% more absorbent than polypropylene absorbents. They also meet NFPA Class A Fire Retardancy (Universal products).

CHOOSING YOUR ABSORBENTS

2 Step two: Identify your absorbent application

Wiping, drips or foot traffic applications

Pads & rolls

Use for wiping or placing under drips and leaks. Pads are pre-cut absorbents, while rolls allow you to choose the length you need.

SOCs & pillows

For use around equipment or placing under drips.

Barrier-backed or heavy traffic applications

Mats & rugs

For use with heavy foot or vehicle traffic, or where a barrier-backed mat is needed.

Emergency spill response

Spill containment and spill kits

Be prepared for emergency spills with a variety of products already bundled together - so you can be confident you have the products you need to contain unexpected spills. Additional spill control available through the use of spill pallets and absorbent storage centres.

3 Step three: Select your absorbent size and weight

Now that you know what you're absorbing, and what style of product you need, you can choose your absorbent from the many sizes and absorbency weights that Brady SPC offers.

CHOOSING YOUR ABSORBENTS

Think you're already using the correct absorbent? Put it to the test!

Want to know if your absorbent is working for you? Start at the end, in the rubbish bin. One of the best ways to pick the right absorbent is to see what it looks like when you're done with it. Take a look.

Check product type

Looks like this absorbent roll is being used to contain a leak – consider using a SOC for containing leaky equipment. Brady offers SPC pads, rolls, SOC's, pillows and more so that you have the right type of product to contain your spill.

Check durability

Are your absorbents falling apart or tearing due to heavy traffic?

Choose a tough absorbent for tough jobs so that you can take advantage of the full absorbent potential without your absorbent falling apart.

Under-saturated

Check absorbency

Are your absorbents being used to their absorbency capacity? Or maybe your current absorbent isn't absorbing the whole spill.

For small spills, choose a medium or lightweight pad to avoid wasting absorbents.

For large spills, use a heavyweight pad to cut down on the number of lighter pads you go through.

Over-saturated

WHY SPC PRODUCTS?

Since 1977, SPC products have helped customers protect against leaks, drips and spills that create safety hazards in the workplace. Brady provides high-quality service, application expertise and product knowledge to SPC distributors and customers.

Brady SPC has a history of innovation and continues to develop industry-leading products and applications. Brady provides on-going lean initiatives to help offset raw material increases to keep costs stable and maintain maximum cost savings for our customers.

Brady SPC - An environmentally friendly company

As a socially responsible company, Brady SPC continually strives to reduce waste by reusing 97% of materials. In working to sustain unused materials, Brady SPC replenishes all wasted raw materials and reduces the amount of materials sent to landfills. Brady SPC's ultimate goal is to eliminate waste, conserve energy, recover resources and continue to work towards a zero waste facility.

WHY IS SPILL CONTROL IMPORTANT?

Beyond the obvious need to protect our environment and to reuse or recycle as often as we can, a proper spill control programme can create a safe and productive work environment for your employees.

By complying with EPA and OSHA regulations around spill control we provide our people with conditions that allow for the greatest productivity and the least amount of down time for our facilities. The cost of non-compliance around this area of regulation can be devastating to any business.

Spill Prevention Control & Countermeasure (SPCC) plan

In the United States, the EPA issued its final rule amending the SPCC under the authority of the Federal Water Pollution Control Act. This regulation became effective as of August 16, 2002.

What is an SPCC plan?

An SPCC Plan is a facility-specific comprehensive description of a facility's containment and counter measures that would prevent an oil spill from occurring as well as procedures to respond and clean-up an oil spill that does occur.

The SPCC plan addresses the following three areas:

- ▶ Operating procedures that prevent oil spills
- ▶ Control measures installed to prevent a spill from reaching the environment
- ▶ Countermeasures to contain, clean-up and mitigate the effects of an oil spill that reaches the environment

REGULATIONS (EUROPE)

Our products support the **89/391/EEC - COUNCIL DIRECTIVE of 12 June 1989** on the introduction of measures to encourage improvements in the safety and health of workers at work -

Article 6: General obligations on employers

Within the context of his responsibilities, the employer shall take the measures necessary for the safety and health protection of workers, including prevention of occupational risks and provision of information and training, as well as provision of the necessary organization and means.

ISO 14001 (appendix 1, A.4.7, emergency preparedness and response), the organisation must draw up an emergency plan which requires the provision of absorbent materials to absorb discharged liquids.

BENEFITS FROM MELTBLOWN POLYPROPYLENE

How meltblown polypropylene sorbents can help you to reduce costs...

75% of (industrial) companies are still using granular to clean up spills and leaks because they don't have or know an alternative, or because they believe that granular is the cheapest solution. At first glance, this may be true but the cost comparison below will show that meltblown polypropylene sorbents are a less costly alternative even though the initial purchase price may be higher.

The cost for cleaning up a spill of 200 litres of oil			
	Granular	Sorbent Pads	QUICKWIK
Material (kg)	200 kg (1 kg of granular absorbs 1 litre of oil)	10 kg (1 kg of pads absorbs 20 litres of oil)	44 kg (1 kg of QUICKWIK absorbs 4.5 litres of oil)
Price per kg (€/kg)	1 €/kg	15 €/kg	3,57 €/kg
Total waste (kg)	400 kg (200 ltr oil + 200 kg granular)	210 kg (200 ltr oil + 10 kg pads)	244 kg (200 ltr oil + 44 kg QUICKWIK)
Disposal cost per kg (€/kg)	0,5 €/kg	0,5 €/kg	0,5 €/kg
TOTAL COST	400 € (200 € + 200 €)	255 € (150 € + 105 €)	280 € (122 € + 158 €)

▶ This is a basic analysis using estimations and averages. Savings would be even higher if labour cost was included in this calculation.

BENEFITS FROM MELTBLOWN POLYPROPYLENE

Reduce costs • Increase productivity • Improve safety

More and more industries are using Meltblown Polypropylene (MBPP) sorbents for the control and clean up of oils, industrial liquids and chemicals in their workplace. See for yourself why MBPP sorbents are the product of choice!

	GRANULES	MBPP SORBENTS
1	 <p>LOW ABSORPTION Once or twice its weight.</p>	 <p>ABSORBS 10 - 25 times ITS WEIGHT so you use less material. Saves money for the overall lowest cost of ownership.</p>
2	 <p>SLOW ABSORPTION hours vs. seconds.</p>	 <p>QUICK ABSORPTION Seconds vs. hours so spills are cleaned up quickly.</p>
3	 <p>MESSY & more difficult to use.</p>	 <p>SIMPLE Use like a giant paper towel!</p>
4	 <p>HIGH DISPOSAL COSTS due to volume needed.</p>	 <p>LOWER DISPOSAL COSTS due to less product needed. Also, environmentally responsible as it incinerates to .02% ash.</p>
5	 <p>DIFFICULT & labour intensive to clean up.</p>	 <p>EASY pick-up and disposal, saving time and money.</p>
6	 <p>Small particles enter and DAMAGE MACHINERY or your finished product. This is why more and more industries are banning the use of granules in their facilities.</p>	 <p>MACHINE FRIENDLY No risk of loose fibres getting into machines or damaging your finished product.</p>
7	 <p>LIMITED chemical resistance.</p>	 <p>WIDE CHEMICAL RESISTANCE MBPP will not react with aggressive chemicals for greater safety.</p>
8	 <p>POTENTIAL HEALTH HAZARDS (i.e. if silica based)</p>	 <p>SAFE No potential health risk of inhaled dust particles.</p>

▶ As a user of sorbents, you know where at least 75% of your leaks, drips and spills may occur. By using MBPP sorbents, you can easily place sorbents under these risk zones - something that is definitely too messy to do with granules.

THINK SMART. WORK SMART.

Oil only

Absorbs oil and repels water

Oil only absorbency

Specialised for oil and other petroleum-based spills, oil only pads and rolls will not absorb water and will float indefinitely. These absorbents are unaffected by temperature and impervious to rot and mildew. Ideal for outside use, Brady's oil only SPC products are equally effective in soaking up petroleum-based solvents and paints, vegetable oils and other non water soluble oil-based fluids.

The technology

The technology (construction layers, weave and loft) behind each of the oil only products helps determine the strength and absorbency of each absorbent. This information along with the product's characteristics are what helps you decide which absorbent is best for your application.

Common liquids absorbed:

- Drilling and cutting fluids
- Hydraulic and brake fluids
- Engine oils
- Transmission fluids
- Lubricants
- Gasoline, diesel and aircraft fuels
- Cooking oils
- Oil-based paints and solvents
- And other oils and petroleum-based fluids

OIL ONLY ABSORBENT FAMILY

All of these pads and rolls start with a highly absorbent polypropylene core - the difference is what happens from there. Features such as durability, absorbency grades and spunbound give you versatile absorbent options for your specific application.

ENV - Oil only pads made with SPC's MAXX technology. Superior absorbency, greater strength plus less weight means lower disposal costs!

- ▶ MAXX pads absorb up to 24 times their weight in oil.
- ▶ With MAXX technology less material is needed to pick up the same amount of oil, which results in lower disposal costs.
- ▶ MAXX pads are also up to 25% stronger! The superior finish on MAXX pads results in less lint and more abrasion resistance.
- ▶ Packed in boxes for easy handling and storage.
- ▶ Ideal for environmental/industrial applications where low cost and high absorbency are required.

- ▶ Allows for filtration with minimal flow rate.
- ▶ No additional pressure needed to force the oily liquid through.
- ▶ Fibres can be used in any size or shaped container in which they are placed.
- ▶ Numerous applications such as pre-filters for compressors, paint filtration, water filtration, etc

Cartridges for use in filter fences.

Filtering of waste water before discharging into water discharge area.

Oil only socs - Ideal sorbent for absorbing leaks and spills around machines

Problem:
Leaks and drips create a slippery work floor.

Solution:
SOCs quickly soak up leaks and drips for a clean and safe workplace.

- ▶ Absorb oil & petroleum based liquids while repelling water.
- ▶ Various lengths - allowing the right size for your application.
- ▶ Strong wicking action: absorption begins instantly after contact with the spilled liquid, no need to turn the soc.
- ▶ Flexible design allows the soc to fit around any machine, corner or curve.
- ▶ FLEXISOC: The ultimate soc for flexibility! Cut the soc into the length you want and re-clip.

Marine

High absorbency on the water

Marine

SPC marine specialty absorbents are designed to float on water and contain or absorb a wide variety of marine fuels and oils. From containment to booming and skimming operations, these absorbents will soak up unwanted fluids on lakes, rivers, streams and coastal shorelines. Marine absorbent products are made for high absorbency and rapid deployment in demanding emergency situations.

The technology

SPC absorbent booms are constructed of highly absorbent polypropylene fibres encased in a durable skin that is lined with a heavy duty tow rope. The booms are fastened with stainless steel connectors on each end to link booms together for fast retrieval. The staple clips provide extra strength which is extremely important when towing heavy booms saturated with oil.

Recommended for:

- Marinas
- On boats & ships
- Loading docks
- Affluent pipes
- Outdoor liquid transfer points
- Fuel storage tanks

MARINE - OIL ONLY ROLLS & BOOMS

ENV - Our most basic oil only rolls. Ideal for marine applications

- ▶ Absorbs oil & petroleum based liquids.

ENV - Oil only pads made with SPC's MAXX technology. Superior absorbency, greater strength plus less weight means lower disposal costs!

- ▶ MAXX pads absorb up to 24 times their weight in oil.
- ▶ With MAXX technology less material is needed to pick up the same amount of oil, which results in lower disposal costs!
- ▶ MAXX pads are also up to 25% stronger! The superior finish on MAXX pads results in less lint and more abrasion resistance!
- ▶ Packed in boxes for easy handling and storage.
- ▶ Ideal for environmental/industrial applications where low cost and high absorbency are required.

SPC Oil sorbent booms - A premium boom to absorb and contain oil spills on water

Multiple booms form barrier to surround & control the spill.

Metal clips to link booms.

Four staple clips for durability.

- ▶ Repel water while absorbing oil and petroleum based liquids.
- ▶ Increased performance for SPC810-E & SPC816-E booms thanks to additional fill (higher absorption capacity) and larger diameter (greater surface area).
- ▶ Float indefinitely even after saturation.
- ▶ Strong outer sleeve for durability.
- ▶ Inner rope provides strength when deploying & retrieving booms.
- ▶ Inner sleeve keeps the absorbent material intact within the booms.
- ▶ 3-4 staple clips at critical stress area add strength and prevent booms from splitting during retrieval.
- ▶ Metal clips & rings allow for easy linking of booms.

SPC Response booms - For the containment of oil spills on water

SPC Mini boom - The ideal solution for oil spills in calm water areas

- ▶ Portable and easy to deploy by 1 person.
- ▶ Lightweight - ideal for remote and difficult to reach areas.
- ▶ Requires minimum storage space.
- ▶ A great solution for fire brigades, first responders, water and road transport companies.
- ▶ Encapsulated chain provides stability.
- ▶ PVC coated material for greater durability.
- ▶ Quick and easy to assemble for a quick response to spills in small streams and canals.
- ▶ Optional PVC carry bag to protect the boom during storage and to facilitate transport.

Universal

For indoor spill control

Universal absorbency

Use these all-purpose absorbents to clean-up oils, coolants, solvents and water-based fluids anywhere in your facility. Around machinery, under leaky pipes or fittings, in messy traffic areas, for general maintenance projects – they are your first choice for indoor spill control. Plus, their grey colour masks spills and stains – helping you resist the urge to pick up the absorbent before it is fully saturated.

The technology

The technology or structure behind each of the universal products helps determine the strength and absorbency of each absorbent. This information along with the product's characteristics (grade, perforations, etc.) are what helps you decide which absorbent is best for your application.

Common liquids absorbed:

- Coolants
- Solvents
- Oils
- Gasoline
- Vegetable oil
- Kerosene
- Latex paint
- And other water-based fluids

UNIVERSAL ABSORBENT FAMILY

ROLLS & PADS

GP - Economical maintenance rolls for applications that require high absorbency and low cost

- ▶ Absorbs a variety of industrial liquids including oils, water, solvents, coolants, etc.
- ▶ GP rolls have a superior finish with less lint for improved abrasion resistance compared to traditional single ply rolls.
- ▶ Ideal roll to cover a larger surface area for a fast clean up of leaks and spills where low cost and high adsorbency are required.

Chemical

Colour coded for safety

Chemical absorbency

Alert your employees to the presence of hazardous fluids with green and yellow chemical absorbents from SPC. These surfactant-treated polypropylene pads and rolls can be used on a wide range of chemicals, including hydrofluoric acid and are chemically inert, so they will not react with aggressive fluids.

The technology

The technology or structure behind each of the chemical products helps determine the strength and absorbency of each absorbent. This information along with the product's characteristics (grade, perforations, etc.) are what helps you decide which absorbent is best for your application.

Common liquids absorbed:

- Acids and bases
- Aggressive chemicals
- Oils
- Solvents
- Citric acid
- Water-based fluids
- Sodium hydroxide
- And other unknown chemicals

CHEMICAL ABSORBENT FAMILY

All of these pads and rolls start with a highly absorbent polypropylene core - the difference is what happens from there. Features such as durability, absorbency grades and coverstock give you versatile absorbent options for your specific application.

▶ Increase safety and save: colour coded waste stream

Save on disposal costs by using different coloured absorbents in specific parts of your facility and throughout your waste streams.

For example: a facility might use yellow absorbents in radioactive areas and green absorbents in their chlorine areas. Then the facility would use grey universal absorbents for the rest of their facility. A colour coded system benefits your employees' understanding of the waste stream because they will assume yellow absorbents are saturated with radioactive waste and green absorbents are saturated with chlorine.

High visibility safety & chemical mat

- ▶ Sign and absorbent all in one.
- ▶ High visibility, safety mat for all purpose fluid pick-up and hazardous chemical.
- ▶ Colour-coded yellow for safety and easy separation of hazardous waste
- ▶ 2-ply construction (Spunbound, Meltblown)
- ▶ Product will not react with aggressive fluids

- Chemical spill response units
- Laboratories and hospitals
- Any industrial application utilising aggressive fluids
- Foot traffic areas or where extra durability is needed

CHEMICAL - INSTANTSORB PADS & ROLLS

InstantSorb Pads & Rolls - For use when chemicals and hazardous liquids are involved

InstantSorb

With InstantSorb-technology, our Spill Control UN pads rolls can quickly absorb almost any industrial liquid. Rolls are ideal to prevent machine or storage leaks from ever hitting the workfloor, while the pads are a supreme tool to react to any spill.

- ▶ Absorb a wide range of chemicals, including acids and caustics.
- ▶ One-sided spunbond gives extra strength as well as lower lint.
- ▶ Chemically inert: product does not degrade or cause a dangerous chemical reaction with the adsorbed liquid.
- ▶ Green colour alerts workers that product is being used for hazardous liquids.
- ▶ Perforated for flexibility – tear at the perforations for smaller sized pads to use only what you need.

Mats & rugs

Clean, dry floors prevent slips, trips & falls

Mats & rugs

SPC absorbent mats and rugs keep aisles and walkways slip-free by absorbing and containing oils, liquids or other spills. They are designed to hold up in your toughest applications and are ideal for high traffic areas and workstations. Compared to an entrance mat, absorbent mats and rugs offer better traction, reduce slipperiness and keep liquids from being tracked from one area to the next.

The technology

SPC absorbent mats and rugs are constructed from durable, polypropylene fibres - a more durable manufacturing process with a larger fibre diameter than meltblown fibres. This technology means that fibres or absorbent materials will not come loose around high traffic areas or workstations.

Common liquids absorbed:

- Bases
- Oils
- Chemicals
- Solvents
- Water-based fluids

MATS & RUGS ABSORBENT FAMILY

All of these mats and rugs start with a highly absorbent core - the difference is what happens from there. Features such as durability, absorbency grades and construction give you versatile absorbent options for your specific application. Use the table below to help you choose the appropriate mat or rug for your applications.

	Applications	Durability	Linting	Absorbency grades	Construction
Battlemat® absorbent roll Page 38	High wear resistance is ideal for heavy foot traffic, forklifts and walkways.	✓✓✓	Low linting	Heavyweight	2-ply, meltblown + spunbound on 1 side, dimpled and perforated (optional)

INDUSTRIAL RUGS & MATS

BATTLEMAT - Camouflage patterned rolls. Tough cover layer hides leaks and drips for longer use, offers sure footing and is ideal for areas with moderate foot traffic

- ▶ Absorbs spills & leaks of any liquid: oils, coolants, water and solvents.
- ▶ Camouflage pattern hides dirt and reduces premature replacement.
- ▶ Durable abrasion resistant top layer stands up to moderate foot traffic.
- ▶ Ideal for use in walkways, production & machine areas, under assembly lines, etc.
- ▶ Perforations available for flexibility: easy to tear off the desired length, minimises waste.

Comfort Spill Mat - The absorbing anti-fatigue mat

The Comfort Spill Mats from SPC are a combination of an absorbent matting fitting inside an anti-fatigue mat.

- ▶ Design provides buoyancy for basic fatigue relief.
- ▶ Silicone free allowing it to be used in vehicle painting facilities.
- ▶ High quality nitrile rubber makes the mat oil resistant.
- ▶ Rough surface allows sorbent to “grip” anti-fatigue mat.
- ▶ Allows you to keep workers safe while protecting the floor from oils and other industrial liquids.
- ▶ Available in an “Oil Only” version as well as a “Maintenance” version for use with general industrial liquids.

Re-Form™
Eco-Friendly Sorbents

QUICKWIK

Eco-friendly and high performance

Re-Form™ absorbents

Re-Form™ absorbents are made from a minimum of 80% recycled newsprint and other cellulose for universal products, and 80% cotton and other cellulose fibres for oil only products. Plus, Re-Form™ absorbents offer greater absorbency, which means you'll have less waste and lower disposal costs.

QUICKWIK

QUICKWIK is a 100% natural product made out of coconut coir that unlike clay-based granulars does not release cancerous silica dust. In addition, QUICKWIK is a lightweight product with a micro sponge honeycomb structure that is highly unlikely to cause any straining or lower back injuries.

The technology

The unique construction of Re-Form™ absorbent material offers superior absorbency. In fact, Re-Form absorbents have been tested to be 25-50% more absorbent than oil-based polypropylene absorbents, so you'll use less product to get the job done. Less waste makes this absorbent both green and lean!

Cost savings

Re-Form™ absorbents are typically less expensive than polypropylene absorbents which are oil-based and dependant upon volatile oil prices.

Re-Form™ absorbents are not intended for use with highly aggressive chemicals.

Re-Form™ universal absorbents

Recommended for:

- Coolants
- Solvents
- Oils & gasoline
- And other water-based fluids

Re-Form™ oil only absorbents

Recommended for:

- Grease
- Coolants & transmission fluids
- And other petroleum-based fluids

RE-FORM™ ECO-FRIENDLY ABSORBENTS

More and more companies are looking for “green” sorbents that save the environment without compromising quality and performance. In response to the increasing demand SPC introduced Re-Form™, a line of environmentally friendly sorbents made from a minimum of 80% recycled newsprint, cellulose or cotton. Re-Form™ sorbents offer high absorbency, strength, durability and help to reduce the company's impact on the environment.

- ▶ **Green** – Made from natural ingredients - a renewable resource.
- ▶ **More absorbent** – 25-50% more absorbent than meltblown polypropylene sorbents.
- ▶ **Cost effective** – More absorbency for the same price. Use less to absorb more - reduce waste.
- ▶ **Safe** – Fire retardant (universal version) - Meets ASTM E84-05 standard.
- ▶ **Stable prices** - Not dependent upon oil prices.

Stations, kits & containment

Keeping you safe from unexpected spills or leaks

Spill containment

A proper spill containment plan can help create a safe and productive work environment for your employees. SPC spill containment products help to prepare and protect any facility with solutions for unexpected, critical accidents. Absorbent storage centres and SPC spill kits provide fast-response solutions for unplanned spills of oils, solvents, coolants and other fluids. SPC drains, spill decks, berms, pans and pallets also ensure facility safety by catching, controlling and containing unexpected leaks, drips and spills.

- Accidental or unexpected spills
- Indoor and outdoor drain applications
- Storing absorbent products at the point of need

SPILL KITS

Be prepared with spill kits on hand throughout your facility!

Emergency response kits to handle any type of spill

Accidents do happen, so it's better to be prepared. Brady offers a complete selection of SPC spill kits in a variety of types and sizes to equip you with everything you need to clean-up accidents when they happen. Quickly and easily clean-up spills of oils, solvents, coolants and other fluids. They are ideal for fast response to critical accidents.

Many of our kits are available in the following types:

- ▶ **Universal/maintenance kits:** For oil, water-based and chemical liquids
- ▶ **Oil only spill kits:** For oil and petroleum-based liquids
- ▶ **Chemical spill kits:** For aggressive and hazardous liquids

Spill kits increase efficiency

Worker productivity and efficiencies can be improved dramatically by placing spill kits or absorbent storage centres strategically around the facility and closer to the areas of need. For both emergency response and routine maintenance and safety, you don't want employees wandering away from their workstation to the other side of the plant or tool room to find the absorbent materials they need.

SPILL KITS

ADR Spill kits - An economical way to keep you in compliance

The European ADR 2005 agreement stipulates that carriers of dangerous goods are obliged to, among other things: "Provide their trucks with all the necessary safety equipment like extinguishers, warning signs, first aid equipment and a spill kit." With this in mind, SPC developed the ADR spill kit. Thanks to its compact design, the ADR spill kit requires a minimum of storage space yet it contains all the sorbents needed to handle a small spill: socs to contain the spill - pads and pillows for the clean up.

- ▶ Economical - The best value for your money.
- ▶ High absorbency at a low cost.
- ▶ Compact: Easy to put in smaller storage areas, behind or under the seat of a truck.
- ▶ Durable see-through bag makes it easy to check the spill response supplies.
- ▶ Quick & easy access to the sorbents ensuring a fast response thanks to the zipper which opens up the entire front of the bag.
- ▶ Easy to carry with handy shoulder strap.
- ▶ Hassle free: Complete with gloves, disposal bags and sorbents - everything you need!

Small kit contains: 25 pads (40 cm x 50 cm) , 4 socs (Ø 7.6 cm x 122 cm), 1 pair of gloves, instruction sheet and 1 disposal bag.

Large kit contains: 35 pads (40 cm x 50 cm) , 1 soc (Ø 7.6 cm x 122 cm), 1 soc (Ø 7.6 cm x 244 cm), 1 pillow (43 cm x 48 cm), 4 pillows (23 cm x 23 cm), 1 pair of gloves, instruction sheet and 2 disposal bags.

One Spill Wonder kits

The One Spill Wonder kits each contain a selection of solutions that enable users to combat small to medium spills:

- ▶ Highly absorbing pads to wipe down equipment and remove spills
- ▶ SOC's to prevent spills from spreading on the workflow
- ▶ Neutralising polymers to neutralise acids or bases
- ▶ Gloves and glasses to protect employees
- ▶ A waste disposal bag to contain all used equipment

Also included in each spill kit are practical, visual instructions for optimal product use.

OPA Kits - Help you comply with the OPA90 regulations

What is OPA? The Oil Pollution Act (OPA) was signed into law in 1990 (USA) in response to one of the worlds largest oil spills, the sinking of the oil tanker Exxon Valdez in Alaska. Regulations were set for oil tankers, vessels, oil tanker owners and operators improving their ability to prevent and respond to oil spills. SPC has developed several kits in order to help you comply with the OPA90 regulations. All of our kits presented here are compliant with the OPA90 regulations.

- ▶ Both 2-drum and 4-drum spill pallets are the same height allowing easy transfer of drums from one pallet to the other.

- ▶ Optional ramp works with both the 2-drum and 4-drum spill pallets.

- ▶ These pallets have been engineered to make sure you can easily use your forklift or pallet jack to re-locate your pallets.

- ▶ Grates can be interchanged between the pallets and offer large openings to easily remove spills.

- ▶ Nestable pallets allow you to make better use of plant, warehouse or trailer space.

SPILL CONTAINMENT

Spill containment solution

Brady's spill containment solutions enable the safe and regulation compliant storage of hazardous substances which can contaminate the water table, aggressive chemicals and flammable substances stored in drums, containers or IBCs.

- ▶ Capacity meets/exceeds European, UK and US standards
- ▶ Manufactured from environmental friendly, and fully recyclable UV-stabilised
- ▶ Resistant against most oils, acids, alkalis and aggressive chemicals
- ▶ Lack of steel parts guarantees protection from corrosion.

Workfloor

Workfloors are a great way to handle and store hazardous fluids and contain potentially hazardous leaks in storage and dispensing areas.

- ▶ Can hold/carry 2 or 4 drums or smaller containers
- ▶ Can be easily assembled with other units by using the connector system
- ▶ Compatible with most forklifts and pallet trucks.

We make products that make the world a safer and smarter place. From the depths of the ocean to outer space, from the factory floor to the delivery room - **we're just about everywhere you look.**

To help minimise our impact on the environment, Brady limits its number of reprints.

Updated versions are always available for download on bradyeurope.com/downloads.
